

3rd DASIM workshop

(Diagnostic Applications of Synchrotron Infrared Microspectroscopy)

SOLEIL Synchrotron

10th - 11th September 2007

Existing networks between biologists, clinicians and synchrotron scientists are already making impressive progress in IR microspectroscopy of cells and tissues leading to the identification of spectroscopic markers of diagnostic relevance. However, the European dimension is missing in these efforts because very few countries have synchrotron IR microspectroscopy facilities. The workshop will represent also the opportunity to present the status of the European IR synchrotron facilities in this area, of the existing research projects and stimulate broad international collaborations.

Local Organizing Committee:

Pascale Roy (SOLEIL)
Ganesh Sokalingum (Reims University)
Paul Dumas (SOLEIL)
Jean Blaise Brubach (SOLEIL)
Frédérique Fraissard (SOLEIL)
Frédéric Jamme (SOLEIL)
Sylvie Pavan (SOLEIL)
Valérie Rouam (SOLEIL)
Sirinart Srichan (SOLEIL)

International Programme Committee:

David Moss (ANKA)
Augusto Marcelli (INFN Frascati)
Michel Manfait (Reims University)
Josep Sulé-Suso (UK)
Peter Lasch (RKI Berlin)
Sheila Fisher (Leeds University)
Mark Tobin (Australian Synchrotron)
Matthieu Réfégiers (SOLEIL)
Jean Doucet (SOLEIL-Synchrotron)
Fiona Lyng (DIT- Ireland)
Gérard Déléris (Bordeaux France)
